New/Edit Carnival

Edit Carnival Data

Name: []

Location: []

Import Competitor Data

Drag/Drop People /Folders

Add Folder... Browse

Events

Import from other carnival | - | +

Create

Designing events manually is →
difficult for user.

Possible:

- Import From spreadsheet?
- Preset configurations?

Edit scores

← Too complex, setting up meets could instead be
a guided process.

Drag/Drop is good.

Scores | People | Setting

- | - | +

Copy from other event

- Current school swimming carnival software - Meet Manager
- Consider project scope.

Meet Manager

- Difficulty setting up carnival. A '.csv' file is used for storing athlete data, but software contains errors preventing simple import.
- Cluttered interface has aged. Not intuitive. Too complex.
- Event/Scoring setup works fine - Good drag/drop function
- Printability

My current wireframes

- Nice setup.
- Main issue are: scope, and setup processes.

Discussion with Blencowe 8/02

- Project scope is too demanding. Project plan must be stripped back.
- Ship software with minimum requirements.
